> These are still subject to change pending the feedback from my proposal.

This project aims to aid new and existing students alike while they are attending university with helpful information about the university itself, such as university societies, locations/campuses, and policies through the medium of a digital chatbot companion to converse with. Its objectives are to:

- Develop a chatbot capable of accurately answering user queries related to university buildings, policies, and societies with a minimum 95% accuracy rate.

- Conduct a thorough literature review on the surrounding topics, namely AI, LLMs and NLP.

- Create effective documentation for all stages of development, highlighting challenges faced during the process.

- Manage time effectively to ensure all project milestones are met on a consistent and regular timeframe.

- Evaluate the effectiveness of an AI assistant on university student acclimatization.

1.2 Literature Search Methodology

AAA

Literature Review

2.1 Themes

2.2 Review of Literature

2.2.1 Review

Check the template document because I'm not too sure if it's formatted this way.

2.2.2 Theory

Check the template document because I'm not too sure if it's formatted this way.
2.3 Summary

Appendix

3.1 Gantt Chart

Figure 3.1: A conceptual Gantt chart of a development timeline.

References

References and bibliographies aren't the same thing. Your references are your directly cited sources, whereas your bibliography is everything you consulted for information, even if you didn't directly cite it.

`https://en.wikibooks.org/wiki/LaTeX/Bibliographies_with_biblatex_and_biber#Splitting_into_different_topics`
That link shows how you can add a "keyword" entry to the bibliography entries. In doing so, you could add a "refs" keyword for your references, and a "bib" for your bibliography.
